

CAPABILITY STATEMENT

Services and Capabilities

Portfolio, Program and Project Management

- Agile PMO
- Capital Planning and Investment Control
- Master Scheduling
- Earned Value Management
- PPM Tool Analysis & Support
- Organizational Readiness & Change Management

Technology Solutions

- Cloud Solutions
- CyberSecurity
- DevOps
- Infrastructure & Networking Engineering
- Service Management
- Mobile App Development

Financial Services

- Payments
- Regulatory Support/Compliance

About iTech AG

Founded in 2008, iTech AG is a small business built on three core values: People First, Customer Centric, and Versatile.

In 2015, iTech AG was certified an 8(a) disadvantaged small business by the US Small Business Administration.

We are a CMMI DEV Level 3 and ISO 9001:2015 certified company.

Key Accomplishments

80,000 global users were successfully migrated to 0365

10,000+ activity lines within each integrated schedule established and managed for several programs across multiple federal agencies

14,000 applications and databases rationalized, migrated and modernized or retired

Covert cyber network designed to enable criminal investigations and digital forensics

25,000 users, 1,000 administrators, 250 developers, and 600,000 tickets supported by a service management solution

\$62 million of federal IT budget was supported and maintained by E300 artifacts and business cases

Over 13,000 future thought leaders have been provided access to quality STEM education through a scholarship program.

PAST PERFORMANCES AND KEY ENGAGEMENTS

Internal Revenue Service – Enterprise Case Management (ECM)

Build and maintain the ECM IT IMS and provide Agile SME support to the IT PMO that will be releasing enterprise case management capabilities to multiple business operating divisions at the IRS. Provide Agile Requirements Management and Governance Process support to the Program Management and Release Management teams.

Internal Revenue Service – eA3 Program (eAuthentication, eAuthorization, eAccess)

Oversee the Capital Planning and Investment Control (CPIC) efforts for the program. Maintain financial tracking and reporting. Built and maintain the eA3 IMS, tracking application upgrades and integrations across the enterprise. Provide PMO support to the Cybersecurity organization, including documentation creation and maintenance.

Internal Revenue Service – Integrated Enterprise Portals & Affordable Care Act (ACA) Program

Design and build a Federal Private cloud. Deliver Middleware SME support, Integrated Master Schedule, and Data Center Administration for the IRS Portals Program. This Cloud hosts the transactional application “Modernized eFiling (MeF)” for all tax filers in the Nation and the “Affordable Care Act (ACA)”. Architected process, established Standard Operating Procedures (SOP) and Governance for IRS’s private cloud. Provide support for virtualization architecture and administration, middleware administration, infrastructure support and cybersecurity compliance for the ACA information return platform, which communicates with ushealthcare.gov.

U.S. Census Bureau – Census Enterprise Data Collection and Processing (CEDCaP)

Developed, integrated, and formally baselined the CEDCaP IMS, that consisted of 12 project schedules, in a span of 2 months. The IMS included over 10,000 activity lines covering all project and program activities. Leveraged tools such as Project Server and MasterLink to build and maintain over 600 Cross Program Dependencies (CPDs) between the projects.

Defense Logistics Agency – Defense Agencies Initiative (DAI)

Managed the Defense Agencies Initiative (DAI) master schedule, with over 25,000 activity lines, reporting progress and earned value management (EVM) to influence decisions of 50 stakeholders across various DoD agencies.

Office of the Secretary of Defense (OSD) – SMART Scholarship Program

Leading an Agile - DevOps implementation of a managed service for a Grants Management solution leveraging ServiceNow's FedRAMP environment. iTech AG architected the entire solution on ServiceNow's platform, developed several external facing portals, with rich reporting, custom workflows and user base access.

General Services Administration (GSA) Public Building Service (PBS) - Rent Bill Management (RBM)

Performs financial management and analysis to ensure compliance across all federal buildings leased in the country.

Treasury Inspector General Tax Administration (TIGTA) – RAFF Implementation

Designed, developed and deployed a segmented network for Cybercrimes Investigators to conduct covert activities, digital forensics, and tracking of threats, as well as store and prepare for criminal prosecution.

DXC Technology (formerly CSC)

Managed the successful migration of a global enterprise from Lotus Notes to Microsoft Office 365 (O365). The migration involved migrating 65,000 email users, 14,000 applications/databases and the decommissioning for the legacy on-premise infrastructure.

Project Hope (iTech AG, LLC) – Mobile Development & Application Architecture Implementation

Architected, developed, and deployed a Mobile Application on the iOS & Android platform that serves as a health connection application intended to connect individuals across the globe with similar medical conditions through a one-stop-shop. This is hosted on Amazon Web Services, which is interconnected to a CMS instance for web development. Through the utilization of these tools, the flexibility to scale on-demand is available to host supplementary members as needed.
